

PART - 7

CSS GRID

(GRID ITEM PROPERTIES)

Follow @PriteshKiri

CSS Grid

The CSS Grid offers a grid-based layout system, with rows and columns, making it easier to design web pages

For simplicity, I have divided the topic into three parts:

1. Grid Terminologies
2. Grid Containers (parents)
3. Grid Items (children)

In PART-1 of this Grid SERIES I have discussed about flexbox terminologies, in PART 2 ,3 ,4 and 5 I have discussed about few of the Grid Container properties, in PART 6 have discussed about Grid Item properties and in this part we will be discussing about Grid Item properties.

CSS Grid

Following are the grid item properties:

1. grid column
2. grid row
3. grid area
4. justify self
5. align self

CSS Grid

4. justify self:

With this property, a grid item inside a cell aligns along the inline axis (row axis).

→ `justify-self: start | end | center | stretch;`

CSS Grid

4. justify self:

With this property, a grid item inside a cell aligns along the inline axis (row axis).

→ `justify-self: start | end | center | stretch;`

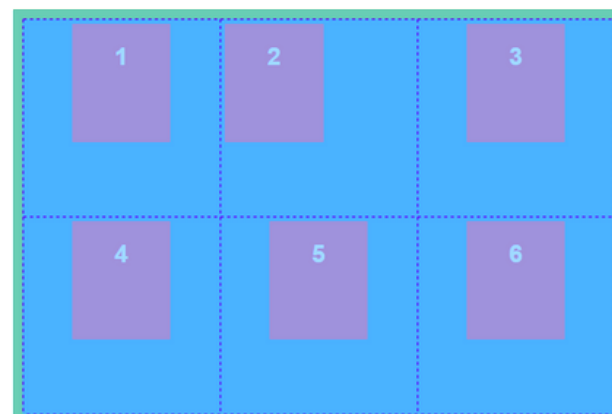

CSS Grid Guide

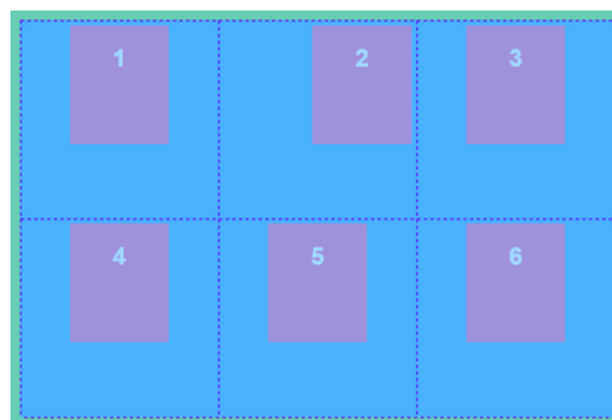

Grid Items Properties

OUTPUT

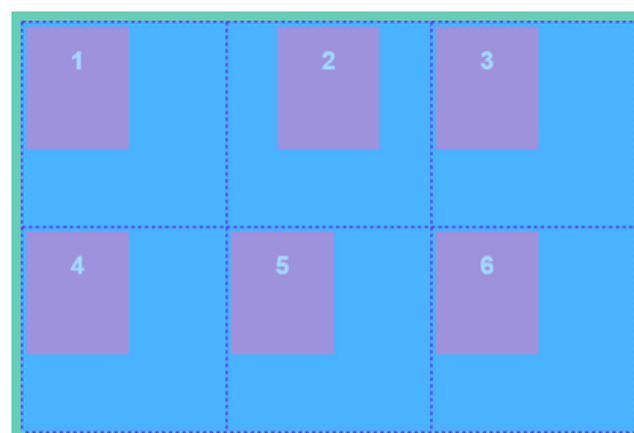

```
.gitem2{  
  justify-self: start ;  
}
```

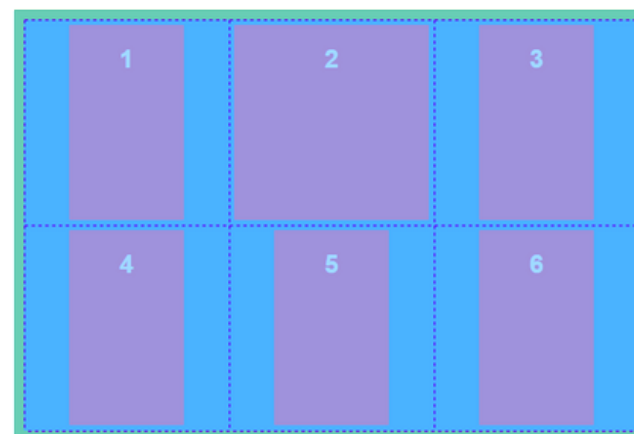

```
.gitem2{  
  justify-self: end ;  
}
```

```
.gitem2{  
  justify-self: center ;  
}
```

```
.gitem2{  
  justify-self: stretch;  
}
```

CSS Grid

5. align self:

With this property, a grid item inside a cell aligns along the block axis (column axis).

align-self: start | end | center | stretch;

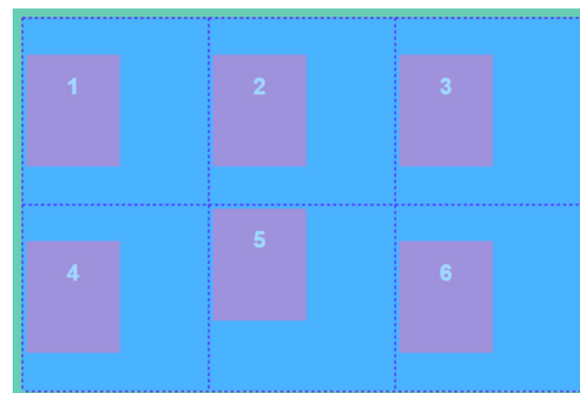

CSS Grid Guide

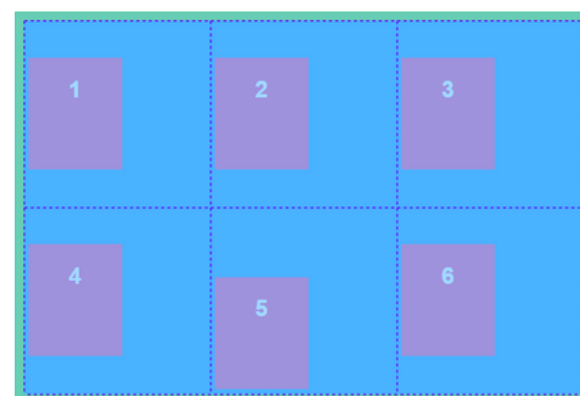

Grid Items Properties

OUTPUT

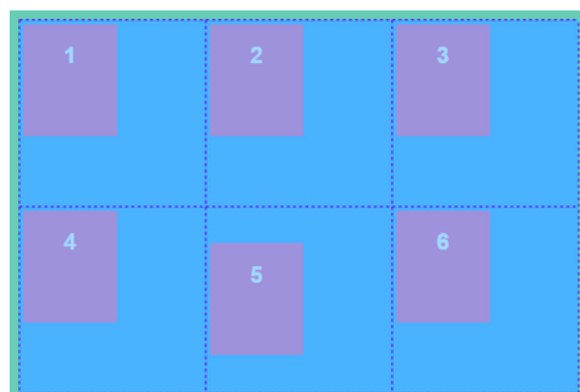

```
.gitem5{  
  align-self: start ;  
}
```

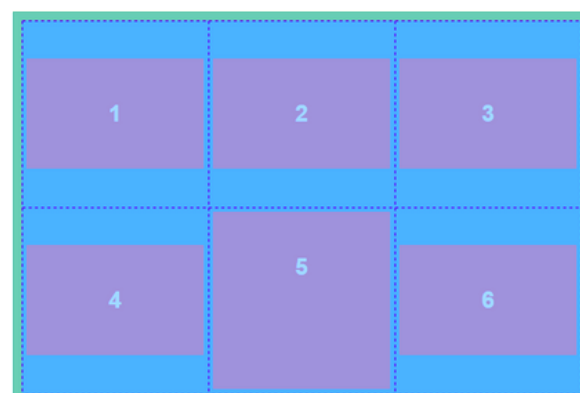

```
.gitem5{  
  align-self: end ;  
}
```

```
.gitem5{  
  align-self: center ;  
}
```

```
.gitem5{  
  align-self: stretch;  
}
```

CSS Grid

That's a wrap!!!!!! 🎁

I hope, all the grid items were clear to you.

Well, that was it for the GRID series...

But Wait !!!!!!!

CSS Grid

There will be one last BONUS post 🚀, which will make your life easier in terms of grid layout 🤖

Stay tuned and keep practicing 🙌

Thanks for reading this thread till the end 😊
